Dustan, I asked them to send me the documents so that I could distribute them to the group (that's what has been happening since the beginning of the project). They also haven't incorporated any comments yet, provided in writing or at the meeting, because they want to look at all the comments together. I'd like to have your comments in writing (an email is fine) so that we have them for when we get our next FOIA, to show NWEA that we weren't in agreement with everything produced by WP.

They didn't include either Chae or I on the latest version.. Not sure if we, OCE has more comments than what we said at the meeting. Chae and I can discuss.

Subject: FW: Workshop Action Items and Follow-Up

Team,

I know Susan & Bob have sent comments in to Willamette Partnership directly, and I'm working my way through the document to give them my comments (and will copy all of you on that) by the end of the week (when I leave on vacation for the next 3 weeks). However, it's not too late for the rest of you to read it and offer comments on any part of it that you had particular concerns with. They just provided a version that has the Roles section that was missing before, so use this version if you can. We will get one more shot at this in Feb. but the more comments we can give them now, the better that document will look.

Also, they provided the comments ODEQ received on the Wilsonville permit (including ours), in case you're interested.

Subject: Workshop Action Items and Follow-Up

Hi everyone,

I hope everyone is enjoying/surviving all the cold clear weather. This email is to follow-up on our workshop Dec 2-3rd in Union, WA. A list of action items is attached, you can let us know if we missed anything.

The most critical action item for agency staff is to **review the Combined Draft Best Practices providing comments by December 23rd**. I've attached a version that includes the Roles in Program Administration section, which was missing from the previous one (I can send the standalone doc upon request), but has not been changed otherwise. I've also attached a version that cuts out all context and commentary, showing only the section headings and draft best practice boxes. Based on workshop discussion, we will not be asking the agencies to sign off on this larger document, but we would like it to represent our current best thinking, so please provide edits through that lens. We will be developing an Executive Summary for this over the coming weeks, which you will receive in mid-January.

We are now anticipating that signatures will be on a brief (~3-5page) joint statement that summarizes the work we have done together and high level outcomes of the process this last year. We will provide a draft of this as soon as we are able, likely early to mid January.

Finally, by request, I've attached Wilsonville permit modification comments from TFT, NWEA, and Kathleen Guillozet, as requested, and you will get a follow-up email including the press release around the updated agreement between EPA and USDA.

Follow-up with any questions.

Thanks,
Carrie
